

PLUMBOT

WhatsApp Sales & Booking Automation

For Homebase Plumbers • Harare, Zimbabwe

AI-Powered

WhatsApp Native

24/7 Automated

Lead Scoring

Plumbot is a fully-automated, AI-powered WhatsApp assistant that qualifies leads, books appointments, follows up with customers, and drives Google reviews -- so your plumbers focus on doing the work, not chasing it.

EXECUTIVE SUMMARY

Plumbot is Homebase Plumbers' always-on WhatsApp sales assistant. It handles every stage of the customer journey — from the first "Hi" message right through to a completed job and a 5-star Google review — without requiring a single manual reply from your team.

Metric	Without Plumbot	With Plumbot
Response time to new leads	Hours (or missed)	~5 min, 24/7 (human-paced)
Follow-up attempts per lead	0–1 (manual)	Up to 4 automated
Lead qualification time	10–20 min per lead	~2 min (automated)
Bookings missed after hours	Most	Zero (always on)
Languages supported	English only	English + Shona
Google reviews solicited	Rarely / manually	Every completed job

How the ROI adds up:

- ✗ Every missed after-hours lead = lost revenue. → ✓ Plumbot replies within 5 minutes, 24/7 — at a natural human pace.
- ✗ A plumber spending 30 min/day on WhatsApp = 182 hours/year. → ✓ Plumbot handles it automatically.
- ✗ Only 1 in 5 businesses actively ask for Google reviews. → ✓ Plumbot asks every time, automatically.
- ✗ Most trades businesses lose leads due to slow follow-up. → ✓ Plumbot follows up within 2 hours, 4 times.

FEATURES & BENEFITS

01

24/7 WhatsApp Response — Human-Paced (5-Min Timer)

Every customer WhatsApp message is answered within 5 minutes, any time of day or night. A deliberate delay timer emulates a real person typing and thinking — not a bot firing back in milliseconds.

Client Benefit: Customers experience a natural, trusted interaction instead of an obviously robotic one. You never miss a lead, but you also never come across as a cold machine.

■ **Potential Gain:** 30–40% more leads captured from after-hours enquiries. Higher trust = higher conversion vs instant-bot competitors.

02

AI-Powered Intent Classification

DeepSeek AI reads every customer message and instantly classifies what they want: bathroom reno, geyser repair, new plumbing, pricing query, or something out of scope.

Client Benefit: The right response is delivered every time. No wrong templates, no confused replies. The bot understands context, not just keywords.

■ **Potential Gain:** Eliminates misrouted enquiries and reduces customer frustration.

03

4-Stage Sales Qualification (Hormozi Framework)

Plumbot guides each customer through Value → Price → Qualification → Close — the same proven framework used by top sales teams, automated.

Client Benefit: By the time a customer books, they already understand your pricing, trust your expertise, and are committed. No price objections on the day.

■ **Potential Gain:** Higher quality leads, fewer no-shows, and shorter sales cycles.

04

Lead Scoring — Hot/Warm/Cold

Every lead is automatically scored 0–100 and classified as Cold, Warm, Hot, or Very Hot based on how much booking information has been collected.

Client Benefit: Your plumber knows at a glance which leads need immediate attention vs which are still warming up. No more guessing who to call back first.

■ **Potential Gain:** Prioritised sales effort = more conversions per hour of plumber time.

05

Automated Follow-Up Sequences

If a customer goes quiet, Plumbot automatically sends up to 4 contextual follow-up messages over 24 hours — rephrased each time using AI so they never feel spammy.

Client Benefit: Leads that would have been lost to silence are re-engaged automatically. No manual chasing required.

■ **Potential Gain:** Industry data shows follow-up can recover 20–35% of otherwise lost leads.

06

Smart Pricing Communication

Plumbot shares pricing overviews and product-specific quotes at the right moment in the conversation. It remembers which pricing it has already sent and never repeats itself.

Client Benefit: Customers get clear, upfront pricing without having to ask twice. Removes the #1 friction point in the sales process.

■ **Potential Gain:** Faster decision-making, fewer price-related drop-offs.

FEATURES & BENEFITS (continued)

07

Bilingual Support — English & Shona

Plumbot detects whether the customer is writing in English, Shona, or a mix of both, and responds naturally in the same language — using authentic Zimbabwean Shona.

Client Benefit: Shona-speaking customers feel respected and understood. Conversion rates among this segment improve significantly.

■ **Potential Gain:** Expands your addressable market to the full Harare population.

08

Plan Upload & Blueprint Handling

When a customer has building plans or blueprints, Plumbot prompts them to upload the files directly via WhatsApp. Files are stored to cloud and the plumber is notified instantly.

Client Benefit: Plumber receives all project documents before the site visit — saving time and arriving prepared.

■ **Potential Gain:** Fewer repeat site visits. More accurate quotes upfront.

09

Google Calendar Appointment Booking

Once a customer is ready to book, Plumbot checks real-time availability, proposes times, and books the appointment directly into Google Calendar — with conflict detection.

Client Benefit: No double-bookings. The plumber's calendar is always accurate and up-to-date.

■ **Potential Gain:** Eliminates scheduling errors and the admin overhead of manual booking.

10

Appointment Reminders (3-Stage)

Plumbot sends three WhatsApp reminders: 1 day before, the morning of, and 2 hours before the appointment.

Client Benefit: Customers show up on time, prepared. Plumber's time is not wasted on no-shows.

■ **Potential Gain:** No-show rates typically drop 40–60% with automated reminders.

11

Dashboard & Analytics

A web-based dashboard gives the team a real-time view of all leads, appointments, lead temperatures, follow-up pipeline, and booking conversion rates.

Client Benefit: Full visibility into the sales pipeline at a glance. Know exactly which leads need attention and why.

■ **Potential Gain:** Data-driven decisions instead of gut feel.

12

NEW: Automated Google Review Request (Email)

When a job is marked as completed, the system automatically sends a personalised email to the customer with a direct link to leave a Google review for Homebase Plumbers.

Client Benefit: You get Google reviews passively, without ever having to ask manually. Reviews are solicited at the perfect moment — right when the customer is happiest.

■ **Potential Gain:** More 5-star reviews → higher Google Maps ranking → more organic leads. Every review compounds.

COMPLETE CUSTOMER FUNNEL — WhatsApp to Google Review

What happens at each stage:

Stage	Plumbot Action	Customer Experience	Client Benefit
1. Awareness	N/A — pre-Plumbot	Sees listing / ad / referral	Strong first impression
2. First Contact	AI reply within ~5 min (human-paced)	Feels like a real person replied	Lead captured + trust established
3. Qualification	Extracts service, area, availability	Feels heard and understood	Qualified pipeline
4. Pricing	Sends transparent pricing overview	Makes informed decision	Fewer price surprises
5. Booking	Checks calendar, books, sends confirmation	Smooth, professional booking	No double-bookings
6. Job	Sends 3 reminders; plumber arrives	Reminded, no no-shows	Efficient job delivery
7. Google Review	Auto-email with review link after job complete	Easy one-click review request	Organic lead engine

CONVERSATION FLOW DIAGRAM

Note: Every outbound message is delayed by a 5-minute human-response timer before sending, so the conversation feels natural rather than robotic. If the customer goes silent at any stage, the automated follow-up engine activates and sends up to 4 contextually rephrased messages within 24 hours.

LEAD SCORING SYSTEM

Every lead is scored in real-time based on how much booking information has been collected. Plumbot tracks four key data points:

Data Point	Points	How Collected
Service Type (bathroom, kitchen, geyser...)	25 pts	AI classifies from first message
Has Plans / Needs Site Visit	25 pts	Customer answers plan question
Customer Area / Suburb	25 pts	Extracted from customer message
Scheduled Appointment Date/Time	25 pts	Appointment booked via Plumbot

Client Benefit: Your plumber sees exactly which leads are hot and which need nurturing — without reading a single WhatsApp message.

FOLLOW-UP AUTOMATION TIMELINE

When a customer goes silent, Plumbot automatically re-engages them up to 4 times within 24 hours. Each follow-up is AI-rephrased so it never feels like a copied message. Contact hours are respected (8 AM – 9 PM).

Lead Temperature	Follow-up 1	Follow-up 2	Follow-up 3	Follow-up 4
VERY HOT	2 hrs	4 hrs	4 hrs	6 hrs
HOT	2 hrs	6 hrs	6 hrs	6 hrs
WARM	3 hrs	6 hrs	6 hrs	6 hrs
COLD	4 hrs	6 hrs	6 hrs	6 hrs

SYSTEM SCREENSHOTS — WhatsApp Conversation Flows

Response Timing Note: Each Plumbot reply is held by a 5-minute human-response timer before delivery. This deliberate delay makes the conversation feel like a real team member is responding — building trust and preventing the 'obviously a bot' experience. The examples below show the message content; in production each bot reply arrives ~5 minutes after the customer's message.

Screenshot 1: New Lead — Bathroom Renovation Enquiry

Homebase Plumbers • WhatsApp

Hi! Welcome to Homebase Plumbers ■ I'm Plumbot, your personal plumbing assistant. What can we help you with today?

Hi I want to renovate my bathroom

Great choice — a bathroom reno can transform your whole home! We do full bathroom renovations from US\$1,500. To give you an accurate quote, which area of Harare are you in?

Im in Borrowdale

Perfect, we cover Borrowdale. Do you already have plans/drawings for the bathroom, or would you prefer our plumber does a quick free site visit first to assess the space?

No plans yet, I'd like a site visit

No problem at all! When works best for you — morning or afternoon, and which days this week are you free?

Wednesday afternoon

Wednesday afternoon works. I have 2:00 PM and 4:00 PM available — which suits you better?

Screenshot 2: Pricing Enquiry — Geyser Replacement

2pm please

Confirmed! ■ Site visit booked for Wednesday 2:00 PM. Our plumber Tendai will be there. You'll receive a reminder the day before. See you Wednesday!

Homebase Plumbers • WhatsApp

How much does a geyser cost?

For a geyser replacement we supply and fit from US\$350 (standard 100L) up to US\$650 (200L + pressure valve). Labour is included. Which size geyser do you currently have, or do you know the size you need?

150L I think

Got it! A 150L geyser supply and fit typically runs US\$420–US\$480 depending on the brand and your location. Would you like us to come out and confirm the exact spec before we quote? It's free.

Yes please, I'm in Greendale

Greendale we cover. When are you available for a free site visit — this week or early next week?

NEW FEATURE: Automated Google Review Request

Once a plumber marks a job as **Completed** in the Plumbot dashboard, the system automatically sends a personalised email to the customer within minutes, asking them to leave a Google review.

Sample Review Request Email:

Subject: How did your plumbing job go? ■

From: noreply@homebaseplumbers.co.zw

Hi Blessing,

Thank you for choosing Homebase Plumbers! We hope Tendai's visit went smoothly and your bathroom renovation is everything you imagined.

If you have 60 seconds, we'd love to hear how it went. Your review helps other Harare homeowners find trusted plumbers — and means the world to our small team.

Why this matters:

- ✓ Google reviews directly impact your ranking in Google Maps search results. More reviews = more organic traffic.
- ✓ 93% of consumers check reviews before choosing a local business (BrightLocal 2024).
- ✓ Asking at the right moment (immediately after a great job) produces 3–5× more responses than asking later.
- ✓ Fully automated — zero effort required from your team. Every completed job generates a review request.

✓ Compounds over time: 10 new reviews this month means more calls next month, every month.

DASHBOARD — Real-Time Lead Pipeline View

Plumbot Dashboard

Security	HTTPS + CSRF + WAMID	Webhook auth, deduplication, SSL

System Architecture Diagram:

SUMMARY & NEXT STEPS

What Plumbot delivers for Homebase Plumbers:

- ✓ **Never miss a lead** — Human-paced WhatsApp responses (~5 min) 24/7 — weekends and holidays included.
- ✓ **Qualify leads automatically** — AI extracts service type, area, availability — without manual effort.
- ✓ **Fill your calendar** — Automatic booking into Google Calendar with conflict detection.
- ✓ **Reduce no-shows by 50%+** — 3-stage reminder system (day before, morning, 2 hours before).
- ✓ **Recover lost leads** — Up to 4 automated follow-ups per lead within 24 hours.
- ✓ **Grow your Google presence** — Every completed job triggers an automated review request email.
- ✓ **Speak your customers' language** — Full English and Shona support with natural code-switching.
- ✓ **See your pipeline clearly** — Real-time dashboard with lead temperatures, appointments, and stats.

Immediate Next Steps:

#	Task	Detail
1	Implement Google Review email trigger	When job status → completed, fire automated review email via SendGrid.
2	Configure Google review link	Add the Homebase Plumbers Google Maps direct review URL to the email template.
3	Test end-to-end funnel	Run a test appointment through to completion and verify the review email fires.
4	Dashboard review metric	Add 'Reviews Sent This Month' stat card to the admin dashboard.

Plumbot — Automated. Intelligent. Always On.
